These heavy-duty rods are much better than the stock rods for several reasons:

- They withstand heat better
- They have a much better side load capacity
- They have longer threaded shafts to accommodate cars that are lowered.

For best performance replace the rears, they wear faster than the fronts.

- A Must For Performance Handling
- Reduces Torque Steering
- Reduces Hub Bearing Wear

C7 Corvette owners are well familiar with the inadequacy of the stock cup holders to hold cans and bottles upright. In fact they would probably say they just flop all over the place during acceleration and braking because the stock holders are too short. The Stop Flop Cup Holder solves this problem because its unique design allows the holders to extend up and lock into place. This keeps cans and bottles upright so you don't have to worry about the "flop" and can enjoy your drive. And when you don't have drinks in the car you can push the cup holders down, close the console door and have a perfectly stock look. Stop Flop installs with Velcro easily and looks like a stock accessory. Buy one for your C7 today and stop the flop!

The Ultimat material was originally designed for automotive use with comfort, performance and durability as the objective. Over 30 years later the Ultimat brand is still the best selling, custom fit logo mat in the automotive aftermarket. Featuring premium two-ply Nylon yarn that is more dense and wear-resistant than OEM carpeting, Ultimats provide great style, function and longevity in every vehicle they're installed. Ultimat Floor Mats are Lloyd Mat's premium quality custom fit floor mats with official licensed logos. This is the latest version of the floor mat we pioneered in 1978 and remains the gold standard in the Auto industry. They are made with high-quality nylon and are twice the weight of most factory floor mats. These mats feature factory compatible anchoring devices and Lloyd's non-skid TractionBac rubber backing. Ultimat Floor Mats by Lloyd Mats have a 5-year limited warranty.

Our custom C6 Corvette ZR1 Style side skirts are made of fiberglass and covered in a carbon fiber finish. This C6 ZR1 style side skirts kit is available in a standard carbon fiber finish as well as all C6 Corvette body colors with a carbon fiber finish. Identical reproduction of the real ZR1 side skirts kit includes (2) rear quarter fender extensions. Comes in a hydro carbon fiber or body color carbon fiber finish. Installs in under 30 minutes on your Corvette. We make each ZR1 style side skirts kit in a climate controlled booth with dust eliminating fans, which results in a OEM quality finish and high luster clear coat shine. The kits are made to order, so please allow additional time for delivery.

**Service Bulletin Number: 00-08-42-002Subject: left headlamp door does not stay closed (shim headlamp door motor/actuator and replace insulators)Condition:Some customers may comment that the left front headlamp door does not remain closed after the headlamps are turned off. Others may comment that the left headlamp door closes when the headlamps are turned off, but then reopens. In either case, the right headlamp door operates properly.Correction:ImportantThe following information applies to the left front headlamp door motor/actuator only. It does not apply to and should not be performed on the right front headlamp door motor/actuator. Install one washer between the left headlamp door motor/actuator and the mounting bracket at each of the three attaching bolt locations. Also, replace the insulator, our P#1030147, on each of the two mounting bracket travel stop tabs. For information on headlamp motor/actuator removal, see the Headlamp Motor/Actuator Replacement procedure in the Lighting sub-section of Body & Accessories in the Service Manual.*

All tints will require some patience to install, this is not a 5 minute process. Average installation time is about an hour if this is your first time working with vinyl. You will need a heat gun or hair dryer, foaming glass cleaner, a squeegee, razor blade and paper towels. Some films are harder to apply than other and as difficulty level increases so do the complaints about the product from installers who are not practiced in vinyl application. Please have professionally installed if there is even a doubt after reading instruction. All kits include installation instructions and there are many you-tube videos offering how-to's as well.

It's a simple 5 minutes plug and play installation that anyone can do. Once installed, you will have full control over the exhaust mode, via a simple ON/OFF remote wireless controller or your Homelink transmitter (simple programming required, instructions provided). - Upgrade Replacement For Stock Plastic Gear
- Made Of Bronze For Long Life
- Includes Bronze Gear, Rubber Insert, T-Brace and Gasket

Re-Engineered for even longer lasting life! Now upgraded to include a newly engineered special steel brace with a special plastic support bushing. **Note About Glue Failure:** We have noticed glue joint failures in the late 2000-2004 C5 plastic housing motors. Glue joint failures happen because the plastic that these headlight motors are made of does not take any adhesive well. The glue joint surface is small and once installed it has to take a tremendous force that occurs when the headlight gets full open and full closed and stops abruptly. For the late 2000-2004 C5 headlight gear kits we have added a special stamped steel brace with a special plastic bushing. This brace and bushing do two things. It applies a slight pressure against the side cover helping to eliminate side cover glue failures. But most importantly it adds a new bearing surface to support the shaft thus removing all the pressure of the shaft from the side cover and transferring it to this new brace. Once installed this repair should last the life of the car. The early (97-99 and some early 2000) C5's have an aluminum housing and do not need this special brace. Those headlight motor assemblies are very heavy duty and only require a new gear and rubber bumper. There are 2 variations of the headlight actuator motor assemblies used on the 1997 and up C5 Corvettes. The 97-99 motor assembly (and some early 2000 models) is all aluminum and has a removable side cover that is held on with 3 machine screws. The gear kit for the 97-99 motor assembly includes a new side cover gasket. The late 2000+ motor assembly is partially plastic (the gear case is plastic - the motor is steel) and it has a glued on plastic side cover. This cover needs to be pried off (broken at the factory glue joint) to replace the worn gear. The cover is easy to pry off and I include a packet of urethane glue to reglue it back on. Included with each replacement gear is a packet of high temperature grease that will not dry out quickly like the grease used by the original manufacturer. Also included: If you have a 97-99 C5 Corvette there is the possibility that one or both of the early aluminum type headlight motor(s) have been replaced with the newer 2000+ style plastic type headlight motor(s). To ensure you receive the correct kit please check to see if the headlight motor(s) in your 97-99 (and early 2000) C5 are plastic or aluminum. The aluminum housing style is the original equipment used on the 97-99 (and some early 2000) C5 Corvettes. They will have 3 screws holding the side cover one while the 2000+ headlight motor assemblies are plastic and the side cover is glued on. This newer style headlight motor change can occur because the 97-99 style motors are no longer available through GM. If a previous owner or a GM dealer has replaced a headlight motor in a 97-99 they may have installed the newer 2000+ style. A quick check will ensure that you order the correct rebuild kit.

CLUTCH » Hydraulic Clutch System

Bleeding the C6 hydraulic system in its stock form is a bear. You've got to have someone pump the pedal while you're under the car crackling the bleeder and hoping everybody's timing is right-not to mention keeping the reservoir full! It's easy to see how something so simple can quickly turn into a huge ordeal. With this "One Man Job" Remote Clutch SPEEDbleeder Line, Tick Performance has taken great strides in making things much easier on you. At 4'+ in length, you're able to route the line to nearly anywhere on the car you want. Usually zip tie it to a brake line coming out of the brake master cylinder so it's easy to reach with the hood popped. Another huge improvement is our SPEEDbleeder end-allowing you to simply crack it open one time and close it once the air is out of the system, instead of having to open and close the bleeder with every pump of the pedal.

Hurst Billet/Plus Shifters incorporate a high ratio pivot mechanism for reduced shifter throw and are sturdily constructed for a more positive precise feel when shifting. Self centering alignment improves 2nd to 3rd up-shift gear changes to reduce the chance of "missed shifts". Patented adjustable bias spring loads on most models allow stick tension to be tailored to drivers preference. Dedicated applications assure a custom fit and eliminate any vehicle modifications for ease of installation.

Features:

- Billet Aluminum Base and Stop Collar
- Steel Gear Select
- Adjustable Positive Gear Stops
- Stainless Steel Rotating Pivot
- Limited Lifetime Warranty

Take full control of your Stingray's 7 Speed Shifter! Eliminate your Computer Aided Gear Select and go for the gear you want anytime. The CAGS system was created by General Motors to ease fuel consumption. It forces you to shift from 1st to 4th gear during slow acceleration. We have designed a harness, the CAGS 7 Speed Skip Shift Bypass, that eliminates this nuisance. Our C7 Corvette 7-Speed Corvette Skip Shift Bypass allows you to disconnect the Computer Aided Gear Selection (CAGS) system at the transmission connector. This device will override computer control of the system and return gear selection choice to you. This custom-designed weathertac harness not only protects connectors from dirt/corrosion problems associated with an open-ended harness, but also allows you to easily reconnect the system if necessary, with no modifications.

----------------	---	--------

Damage to 2005-2011 C6 Corvette Front Skid Plate & Lower Radiator Support Cradles is very common. They are very susceptible to dents, cracks, and scrapes from running into parking lot stops and curbs. If the damage is serious enough your Corvettes radiator could be dislodged, creating havoc with cooling issues. If you have had a front end collision then you certainly must replace this item when rebuilding your Corvettes front end. Our new GM C6 Corvette Front Skid Plate & Lower Radiator Support Cradle bolts to the front frame extensions allowing you to return your Corvette to its factory condition. One way that you can help prevent your Corvette skid plate/radiator support cradle from being damaged is to install some of our C6 Corvette front bumper skid rollers. Our front bumper skid rollers take about an hour to install. They feature an active skid plate design with proprietary integrated urethane wheels that will eliminate costly front-end damage caused by lowering, steep driveways or other obstacles. Each set includes all necessary hardware. Welding is not required to complete installation but is recommended. NOTE: C5 support bracket shown.

(xviii) Return Policy. Items must be returned in the original packaging within 30 days of invoice date for a refund of product cost to the original terms on the invoice. Items returned within 30 days not in the original packaging are subject to a 30% restocking fee. Items returned after 30 days not in a condition to be resold will be repaired and returned at the customer's expense. If the item is not repairable it will be returned to the customer at the customer's expense. Items returned after 30 days in the original packaging you will be issued a refund to the original terms on the invoice less a 30% restocking fee. Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. Exception returns may result in a merchandise credit. There are no returns on seatbelts. There are no returns on special order items. In the event the item is defective it will be replaced. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xix) Cancelled Orders. If a customer requests cancellation of an order after the order is in processing in our warehouse, or after the goods have actually been dispatched from the warehouse to the shipping department, www.corvettedepot.ca reserves the right to charge a restocking fee of up to 30% of the value of the goods, deducted from the resultant refund or credit. (xxi) Pricing Policy: Due to the fluctuation in exchange rate on a daily basis, www.corvettedepot.ca cannot provide a refund for

any decreases in pricing on our website. Pricing of all parts includes conversion into Canadian dollars based on the daily exchange rate. www.corvettedepot.ca reserves the right to cancel any orders due to pricing errors on any products.

(xxii) Electrical Item Warranty: www.corvettedepot.ca does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
