All tints will require some patience to install, this is not a 5 minute process. Average installation time is about an hour if this is your first time working with vinyl. You will need a heat gun or hair dryer, foaming glass cleaner, a squeegee, razor blade and paper towels. Some films are harder to apply than other and as difficulty level increases so do the complaints about the product from installers who are not practiced in vinyl application. Please have professionally installed if there is even a doubt after reading instruction. All kits include installation instructions and there are many you-tube videos offering how-to's as well.

With this "One Man Job" Remote Clutch SPEEDbleeder Line, Tick Performance has taken great strides in making things much easier on you. At 4'+ in length, you're able to route the line to nearly anywhere on the car you want. Usually zip tie it to a brake line coming out of the brake master cylinder so it's easy to reach with the hood popped. Another huge improvement is our SPEEDbleeder end-allowing you to simply crack it open one time and close it once the air is out of the system, instead of having to open and close the bleeder with every pump of the pedal.

C7 Corvette owners are well familiar with the inadequacy of the stock cup holders to hold cans and bottles upright. In fact they would probably say they just flop all over the place during acceleration and braking because the stock holders are too short. The Stop Flop Cup Holder solves this problem because its unique design allows the holders to extend up and lock into place. This keeps cans and bottles upright so you don't have to worry about the "flop" and can enjoy your drive. And when you don't have drinks in the car you can push the cup holders down, close the console door and have a perfectly stock look. Stop Flop installs with Velcro easily and looks like a stock accessory. Buy one for your C7 today and stop the flop!

Introducing the first and only wireless remote designed to give you full control over the Z06 exhaust. This patent pending product requires no drilling or running wires through your car. It's a simple 5 minutes plug and play installation that anyone can do. Once installed, you will have full control over the exhaust mode, via a simple ON/OFF remote wireless controller or your Homelink transmitter (simple programming required, instructions provided). Once the Homelink is programmed, you can just use that to work your exhaust. Actually, you will get two sleek ON/OFF wireless controls that can be mounted anywhere and will control the exhaust up to 50' away. The "OFF" mode gives you that race car sound 100% of the time. The "ON" mode works as the quiet stock setting and is preset to OEM 3,500 RPM. The switch can be used anytime the car is running, allowing you to show your friends what a cool exhaust you have as you can use the remote and open and close the flaps on demand.

- Upgrade Replacement For Stock Plastic Gear
- Made Of Bronze For Long Life
- Instructions Included

- Includes Bronze Gear, Rubber Insert and Gasket

There are 2 variations of the headlight actuator motor assemblies used on the 1997 and up C5 Corvettes. The 97-99 motor assembly (and some early 2000 models) is all aluminum and has a removable side cover that is held on with 3 machine screws. The gear kit for the 97-99 motor assembly includes a new side cover gasket. The late 2000+ motor assembly is partially plastic (the gear case is plastic - the motor is steel) and it has a glued on plastic side cover. This cover needs to be pried off (broken at the factory glue joint) to replace the worn gear. The cover is easy to pry off and I include a packet of urethane glue to reglue it back on. Included with each replacement gear is a packet of high temperature grease that will not dry out quickly like the grease used by the original manufacturer. Also included: Complete step by step detailed rebuilding instructions and how to remove the headlight motor assembly from the car. If you have a 97-99 C5 Corvette there is the possibility that one or both of the early aluminum type headlight motor(s) have been replaced with the newer 2000+ style plastic type headlight motor(s). To ensure you receive the correct kit please check to see if the headlight motor(s) in your 97-99 (and early 2000) C5 are plastic or aluminum. The aluminum housing style is the original equipment used on the 97-99 (and some early 2000) C5 Corvettes. They will have 3 screws holding the side cover one while the 2000+ headlight motor assemblies are plastic and the side cover is glued on. This newer style headlight motor change can occur because the 97-99 style motors are no longer available through GM. If a previous owner or a GM dealer has replaced a headlight motor in a 97-99 they may have installed the newer 2000+ style. A quick check will ensure that you order the correct rebuild kit.

1024906 Headlight Motor Bronze Gear Repair Kit, 1997-1999 74.99

- Upgrade Replacement For Stock Plastic Gear
- Made Of Bronze For Long Life
- Includes Bronze Gear, Rubber Insert, T-Brace and Gasket

Re-Engineered for even longer lasting life! Now upgraded to include a newly engineered special steel brace with a special plastic support bushing. **Note About Glue Failure:** We have noticed glue joint failures in the late 2000-2004 C5 plastic housing motors. Glue joint failures happen because the plastic that these headlight motors are made of does not take any adhesive well. The glue joint surface is small and once installed it has to take a tremendous force that occurs when the headlight gets full open and full closed and stops abruptly. For the late 2000-2004 C5 headlight gear kits we have added a special stamped steel brace with a special plastic bushing. This brace and bushing do two things. It applies a slight pressure against the side cover helping to eliminate side cover glue failures. But most importantly it adds a new bearing surface to support the shaft thus removing all the pressure of the shaft from the side cover and transferring it to this new brace. Once installed this repair should last the life of the car. The early (97-99 and some early 2000) C5's have an aluminum housing and do not need this special brace. Those headlight motor assemblies are very heavy duty and only require a new gear and rubber bumper. Granatelli 0 ohm wires are patent protected by United States Patent number 7,185,622. This patent covers our unique method of producing ignition wires of extremely low resistance while maintaining very high noise suppression. The benefit of this invention is that full electrical energy from the ignition source is transmitted to the spark plug. The end result of the application of this method is increased horsepower, torque and fuel economy.

---------	--	--------

Damage to 2005-2011 C6 Corvette Front Skid Plate & Lower Radiator Support Cradles is very common. They are very susceptible to dents, cracks, and scrapes from running into parking lot stops and curbs. If the damage is serious enough your Corvettes radiator could be dislodged, creating havoc with cooling issues. If you have had a front end collision then you certainly must replace this item when rebuilding your Corvettes front end. Our new GM C6 Corvette Front Skid Plate & Lower Radiator Support Cradle bolts to the front frame extensions allowing you to return your Corvette to its factory condition. One way that you can help prevent your Corvette skid plate/radiator support cradle from being damaged is to install some of our C6 Corvette front bumper skid rollers. Our front bumper skid rollers take about an hour to install. They feature an active skid plate design with proprietary integrated urethane wheels that will eliminate costly front-end damage caused by lowering, steep driveways or other obstacles. Each set includes all necessary hardware. Welding is not required to complete installation but is recommended. NOTE: C5 support bracket shown.

Exception returns may result in a merchandise credit. There are no returns on seatbelts. There are no returns on special order items. In the event the item is defective it will be replaced. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xix) Cancelled Orders. Please be advised that once an order is submitted to Corvette Depot, there is no guaranteed possibility of cancellation. If you have attempted to cancel your order with us, and your cancellation has been denied, the item or items that you have ordered may not be eligible for cancellation. Painted Products, Floor Mats, Carpet, Interior Softgoods such as Seat Covers / Door Panels), the item is drop shipping from the manufacturer, the item is a gift certificate / digital gift card, or your order is being processed for a return.

If a customer requests cancellation of an order after the order is in processing in our warehouse, or after the goods have actually been dispatched from the warehouse to the shipping department, Corvette Depot reserves the right to charge a restocking fee of up to 30% of the value of the goods, deducted

from the resultant refund or credit.

(xx) Verify Members' Address: Corvette Depot reserves the right to contact a Member via email to verify the accuracy of account information (including the Member's correct name and address) that is needed to provide the Member with the information he or she requested from Corvette Depot.

(xxi) Pricing Policy: Due to the fluctuation in exchange rate on a daily basis, Corvette Depot cannot provide a refund for any decreases in pricing on our website. Pricing of all parts includes conversion into Canadian dollars based on the daily exchange rate. Corvette Depot reserves the right to cancel any orders due to pricing errors on any products.

(xxii) Electrical Item Warranty: Corvette Depot does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
