Best Quality Reproduction Camaro U Jamb Seals Officially Licensed GM Restoration Part Steel Inserts Just Like Originals Fits At The Base Of The Quarter Window Glass In The Door Jamb The quarter window U-Jamb seals are a part of the weatherstripping on your 1967, 1968, or 1969 Camaro. Weatherstripping is one of the first things to deteriorate on your Camaro simply because it gets baked by the sun, frozen by the winter chill, and slammed in the door. Matching factory specifications, these U-Jamb seals will replace your original weatherstrip seals on your quarter windows, and will protect your windows from elemental damage. Fits Super Sport (SS), Rally Sport (RS) or Z28.

2029262 Quarter Window U-Jamb Seals, Coupe & Convertible, 1967-1969 26.99

Best Quality Reproduction Molded Ends With Steel Inserts Soft & Pliable Plastic Clips Included Ozone & UV Resistant The door and roof rail seals on your 1968, 1969 Camaro are constantly attacked by the adverse elements of changing weather conditions, and as such, can be worn down quickly. However, without these seals, the weather barrage could then start affecting your Camaro's interior! We want to avoid this at all costs. These seals match factory specifications and will easily replace your original weatherstrips. Being ozone and UV resistant, these seals are sure to protect your Camaro, fit better than the original GM part. You'll be much better off with these new weatherstrip seals.

Replacement trunk weatherstrip with correctly configured extruded rubber. The weatherstrip is extruded to fit the groove around your trunk body securely and tightly to avoid water entering the trunk area. After just a few short years the original weatherstrip can become brittle and perhaps break off leaving gaps around for water to enter. Avoid the damage caused to your trunk area and replace your weatherstrip! Note: Installs using 3M brand Super Weather strip Adhesive part # **08008**.

Best Quality Reproduction Trunk Weatherstrip Exact Profile As Original Dense Foam Soft & Pliable Cut-To-Fit (151) For Maximum Adjustability Great Alternative To The Very Expensive Latex Trunk Weatherstripping Camaro trunk weatherstrips will crumble, fall apart, and cause your 1967-1981 F-Body Camaro trunk drop offs to fill up with rainwater and your water-based trunk spatter paint to dissolve away. Without the weatherstrips, your Camaro's trunk could become ruined with water, making it appear dingy and musty. Strunk dry like it was meant to be. Matching factory specifications, this weatherstrip seal can replace your original worn weatherstrips, making it look as good as new. This Camaro weatherstrip is cut-to-fit because in some cases, the corners require the weatherstrip to be bunched together for the best seal. Fits: 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980 & 1981 Coupe or Convertible, Super Sport (SS), Rally Sport (RS), Z28, Type LT or Berlinetta.

Cut out your old plates, flush weld in these replacement plates and make your old Camaro subframe as good as new. NOTE: These plates must be welded flush with the surrounding metal or subframe geometry could be seriously effected. On 1970-81 Camaros, the mount plate that welds to the under firewall mount must be trimmed to fit. 75-81 Subframes have some mounting holes moved forward. These plates will need to be aligned properly for use.

2031818 Subframe Mounting Points Repair Plate Set, Lower, 1967-1981 66.99

A complete kit of subframe mounting plates will take care of the rotted out crucial areas where the subframe bushings mount. After years of abuse, the plates may become damaged beyond repair. You certainly don't want to replace the bushings without checking the plates. These new plates will secure the subframe and add stability to the original frame. Includes the rear subframe plates, middle frame plates and the core support plates.

Officially Licensed GM Restoration Part® Made in USA Note: These new plates must be welded to the subframe. **Applications:**

Restoration Correct Camaro Shackle Officially Licensed GM Restoration Part Correct Shackle Side Plates Stamped From Medium Carbon Steel & Zinc Plated Technically Correct Shouldered Through Bolts & Marsden Nuts Two Required Per Car Is the rear suspension on your 1967-1970 Camaro starting to wear down? The shackle assembly mounts the rear of the leaf spring to the frame rail hanger. Over time the rubber bushings deteriorate and can't provide the support and impact absorption you need. While not technically correct for judging, this replacement will give great results with your rear suspension project on your 1967, 1968, 1969 or 1970 Camaro Standard, Rally Sport (RS), Super Sport (SS) or Z28.

CARPET & INSULATION » Carpet Guard

Best Quality Reproduction Injection Molded Black Plastic Correct Thickness And Weight Mounts Under Steering Column To Transition Between Firewall And Carpet Nice reproduction of the carpet firewall guard which is usually found in an original car with the holes for the screws broken out from one too many quick shifts. While you're at it, don't forget to pick up the correct screws.

3443586 Firewall Carpet Guard, 1967-1969 37.99

Highly detailed injection molded OER® reproduction of the original carpet firewall guard, far superior in construction to the previous vacuum formed part. Each reproduction guard is now more precise than ever! Features include correct thickness and weight. This guard is located on the firewall below the steering column on all 1967-69 Camaro and Firebird models and 1968-72 Nova models. The floor carpet tucks up underneath the firewall guard for correct installation. This commonly cracked or missing guard should be replaced whenever installing new carpet. Note: Use Fastener 3764424.

Best Quality Reproduction Camaro Shifter Lens Crystal Clear Acrylic Sharp Defined Edges Unlike Other Reproductions Correct Font In Correct Color Green For 3-Speed Automatic TH-350 & TH-400 Transmissions Fits 1968-1969 1st Gen Camaros The factory shift dash indicator in your 1968 or 1969 First Generation Camaro's dash can often break after excessive use. While the indicator was originally located in the dash clutter, the parts used to repair the factory set up were often very difficult to find. Manufactured by Muscle Car Industries, this shifter position indicator has correct green color font, sharp defined edges, a crystal clear acrylic, and a thick peel-and-stick polished plastic plate that will fit in F-Body Camaros with TH350 or TH400 Turbo Hydra-Matic automatic transmission. With this new insert, you'll never wonder what gear you're in again as you're cruising down the road.

Reproduction Of Original 1 Pair Per Car Black Finish For Rear Doors Fits 1968-1969 Camaro Models 1968 or 1969 Camaro's door jamb windlace protects the occupants from the otherwise sharp edges of the door jamb sheet metal lip. Rear windlace also acts as a cosmetic covering of the door jamb in order to keep the inside panel looking clean and sharp. Quality Restoration Correct Glove Box Liner Fiberboard As Original Fully Assembled For Cars Without Air Conditioning Fits 1967-1968 1st Gen Camaros Being made of fiberboard originally, the glove box is one of the first things to disintegrate on your 1967 or 1968 First Generation Camaro. With the glove box door having two indentations for cups, the glove box liner was bound to be weighed down over time, along with getting messy. For cars without air conditioning, this glove box liner is fully assembled and made of fiberboard as the original. Treat your F-Body to the best interior makeover, and start with new glove box liner. NOTE: Not for use with Vintage Air systems.

Reproduction of the inner rear sail panels for use in conjunction with the headliner on the inner rear side section between the side quarter window and the rear back window. These die-stamped panels include the cardboard portion with the correct headliner material attached. 1968-1969 models use Bedford ribbed material. Simply remove the original sail panels on the RH and LH sides and install the new panels. **Made in USA** Sold only as a pair. Important: Due to variations in mounting hole locations on sail panels, these reproductions are supplied with velcro pads for mounting. If mounting clips are desired to attach sail panels, provisions for mounting clip holes must be cut out. It is recommended to keep original sail panels in order to use as a template for correct mounting hole locations specific to the vehicle. The original metal attachment flange will need to be transferred from back of original sail panels for correct installation. Note: If you are purchasing an original style headliner, the sail panel material is included with the headliner. In this case just order the uncovered sail panels (part # **SP1**) and install the material the uncovered panels.

Best Quality Reproduction Camaro Dome Light Base
Bright Chrome Over Plastic As Original Correct Length and

Potential Fire Hazard A good looking dome light is a must
for your 1967, 1968, or 1969 Camaro's restoration. Take
note of the featured picture where the chrome is removed
from the terminal mounting points. On inferior
reproductions, the chrome is left in this area, creating a
fire hazard by completing the circuit outside of the bulb
filament. This causes the dome light base to melt which
could set fire to the entire headliner. This dome light
reflector base fits 1967, 1968 or 1969 Standard Camaro
Coupes, Super Sports (SS), Rally Sports (RS) and Z28.

Ever been driving down the road and hear an annoying rattle from the back window area of your 1967, 1968, or 1969 Camaro? You simply may have forgotten to install the jute package tray insulation under the package tray, and it is now just rattling against the metal package tray shelf itself. However, you can just line it up with the existing speaker or rear defogger holes, cut it to fit, and enjoy music instead of the rattles. Secure a more clear sound and overall pleasant feel from your 1967, 1968, or 1969 Camaro today!

Reproduction of Original Exact GM and DOT Standards
Gold Cad Plated Thread Sealant Applied as Original Sold
Each (4) Required per Car Seat belt bolts pass through the
seat belt and on through the floor of the car. The applied
sealant keeps air and water from entering the passenger's
compartment. The end of the bolt threads usually get
rusty making the bolt useless at times and possibly
unsafe. Why take a chance with a major safety item?

Reproduction Of Original Over the years, these 1970, 1971, 1972, 1973, 1974, 1975 Camaro radiator core support bushing fatigued from gravity and environmental pressures bringing back those annoying squeaks and noise so common in the past. Replacement of these 1970, 1971, 1972, 1973, 1974, 1975 Camaro radiator core support bushings can be done with minimal mechanical knowledge and basic tools in an afternoon. Our F-Body radiator core support bushings are made from high quality, extra firm rubber with the proper steel insert. Our steel inserts are carefully cut to factory specifications which are critical to proper crush during torque application. All new washers and nuts are included to replace the old warped, rusted and stretched units.

2029142	Camaro/Firebird Clutch Bellcrank Upper Push Rod Boot, 1967-1969	13.99
---------	---	-------

The bellhousing to clutch fork rubber boot seals out water and dust by sealing around the clutch fork and the rectangular fork hole in the Camaro clutch bellhousing. Every time you push the clutch pedal in your manual transmission Camaro, the clutch fork boot gets a work out and will eventually tear. NOTE: Camaros with hydraulic throw out bearings may use this boot for the hydraulic lines to pass through as some measure of protection. However, the clutch fork boot will not provide an air tight seal.

*Stock Replacement Also Called A Rear End Cover Gasket
The Camaro differential cover gasket on your 1967, 1968, or 1969 Camaro is located between the rear end and the cover. This gasket is prone to wear and tear, breaking, and cracking. Overtime, all of this stress will culminate, resulting in leakage. This means that it is now time to replace your 1967, 1968, and 1969 Camaro's differential cover gasket. Did you know? Many people in our hobby refer to the differential cover gasket as a rear end cover gasket.*

Quality Reproduction Wide Head Phillips Machine Screw Set Of Three Two Sets Required Per Car These screws will undoubtedly cause you the most frustration when you are tearing your Camaro down for a restoration. This set of three screws mounts the door latch mechanism into the door shell. The problem is with the end of the screw sticking out into the door where it can be exposed to rain and humidity; they become hopelessly stuck in the mechanism. Be sure to use the correct Phillips bit or you will be there for a while!

Show Quality Licensed Reproduction Lower Molding Smooth, Bright Anodized Edges as Original Bonded Matte Black Finish Original Material and Thickness Fits Standard Grille Only The front grille on your 1968 standard Camaro is at the most prominent place on your car...out front where everyone can see it. However, it is also the most vulnerable to rain, rocks and road grime. As you know, anodized moldings can haze over time and the black finish can be chipped by stones which looks bad against a fresh paint job. This standard lower grille molding has correct original thickness, polished aluminum stampings with quality bonded black-out coating, and correctly spaced and plated mounting stud clips.

Reproduction Of Original Correct Screw and Nut Set Set Covers One Headlamp 4 Required Per Car Fits 1967 Or 1968 1st Gen Camaros The headlights are vital on your 1967 or 1968 first generation Camaro, especially when driving at night or in harsh weather conditions. It is possible over time that your head light assembly can become loose, and you may have misplaced your adjusting screw. Each headlamp required an adjusting screw and nut to keep it secure and ready to use while driving. This set covers one of your Camaro's head lamps, however four are required to complete your car. Go ahead and get enough for each of your headlights so you can rest assured while on the road.

2028829 Headlight Adjusting Screw & Nut, 1967-1968 2.99

These plastic barrel type nuts push into the square holes in the Camaro fender around the front leading edge and are used to hold in the headlight bezels via screws. Being out front of your Camaro in the elements, these nuts usually turn to dust and need to be replaced. Save yourself the headache before you need these for your Camaro restoration.

Show Quality Licensed Reproduction Bright Anodized Edges as Original Bonded Matte Black Finish Pair, RH/LH The headlight bezels on your 1968 standard Camaro are out in front just like your grille. Everyone can see how the elements have not been kind to your original headlight bezels. The anodizing can haze over time and the black finish can be chipped by all sorts of things coming up off of the road. Original GM bezels were squared off on the leading edges unlike the later, rounded GM replacements and other reproductions available in the marketplace.

----------------	---	------

Factory Style Hardware Includes Hardware Needed Necessary To Mount Front License Plate To Front Valence 5-Piece Kit A new Camaro license plate bracket mounting hardware kit may be required on your 1969 Camaro. Over time, parts give out and break. Also, the license plate mounting hardware can be easily lost when replacing the front valence, or maybe your classic Camaro never had a front license plate to begin with. This mounting bracket is responsible for securely mounting your Camaro's license plate bracket to the front valence. It is a crucial element of your car, and is even required in some states, so don't test your luck. Without this bracket, the front license has no way to be placed on the bumper.

Without them, your glass would become loose and possibly fall out. Over time, these clips and pin studs also can rust from constant exposure to weather elements. These clips will attach your rear window moldings to the pin studs on the rear window frame. Replace the old clips on your F-Body Camaro before installing new windshield moldings with these clip reproductions.

Reproduction of Original Correct Height, Length and Profile 13 Clips Per Set End Clips Sold Separately as Part # WM-8 Replacement Pin Studs Available Separately as Part # WM-40 Fits 1967-1969 1st Gen Coupes The molding clips for your 1967, 1968, or 1969 first generation Camaro's windshield can often become cracked, brittle, or go missing over the years. The clips and pin studs at the windshield area are also prone to rust due to constant exposure to the elements. This all leaves your windshield moldings unprotected and unable to do their job fully. This set comes with 13 clips, all the correct height and length for your Coupe.

Made from stainless steel, this set is a great option for the casual restoration project for daily drivers who don't need show correct perfection. Whether it is your everyday car, a restoration for your kid, or just a casual replacement, we understand that not everyone needs the most expensive option for their Camaro, especially when a more affordable alternative will get the job done. These stainless steel moldings may need slight fitting alterations, but should make for a simple installation. This set of 5 molding pieces is a great replacement which will cover your front windshield glass for years to come.

Correct Reproduction Of Original 1/4 SAE Head (Not Metric) Correct Diameter Washer Retains Cowl Vent Panel In Place 1 Set Per Car Fits 1st Gen Camaros Screws can break or go missing extremely often, even when they are mounted to something, like your cowl vent grille panel on your 1967, 1968, or 1969 first generation Camaro. You don't want to let this go unnoticed, as it could mean trouble for your grille panel. Without the screws keeping it secure, the cowl vent grille could even come apart itself, leaving your F-Body's exterior looking damaged. Only one set is needed for per, since it will retain a whole cowl vent panel. Don't wait to keep your body panels looking great and feeling secure.

We've pulled up at a car show or cruise in, forgotten about the spoiler on the front of the Camaro and crushed it on the curb breaking it into a million pieces. We feel your pain! We are proud to offer this reproduction Camaro front spoiler which has a little give in it just like the originals did. Other inferior Camaro spoilers out there are too brittle, too thin or just too glossy to look right.

cover plates serve an important function during final body
assembly. At the Fisher Body Plant, your Camaro body
goes through a chemical bath which requires full
submergence, and having holes scattered throughout the
floor and trunk allows these chemicals to drain out when
the body is pulled from the tank. These reproduction drain
plates are not merely replacement plates, but properly
stamped units made from correct gauge steel and
galvanized for added corrosion protection. Remember to
apply the proper body seam sealer during installation,
which is offered separately.

Camaro bulbs burn out; it's just a fact of life. And,
Murphy's Law states they will burn out at the worst time
in the worst possible place. Over time, constant heating
and cooling slowly deteriorates the seal where the
contacts are exposed allowing the gas to escape from the
bulb. You will not find a more complete selection
anywhere else. If we don't have it, it's not being made.*

Premium Quality Blower Motor Resistor Replaces Original Exactly For 1967-1981 Camaros Without Air Conditioning Located On Top Of Under Dash Heater Box Having trouble getting hot air out of your Chevrolet Camaro's heater system on anything other than a high speed? The problem is most likely your blower motor resistor! This little fiberglass board uses a series of progressive resistors to regulate the motor's speed throughout the switch range. The highest speed of the heater blower motor is not controlled by the resistor. Because of this, when the resistor fails, the fan will often work on the highest speed setting and not any lower speed. You shouldn't have to settle for getting just one speed.

The Camaro's dimmer switch had to survive mud, snow and dirt over the years while it was mounted to the driver's side front floor pan. It is very common for these dimmer switches to fail.

Replacement Dimmer Switch

3049156 Floor Mount Dimmer Switch, 1961-1976 10.99

Your Camaro's ignition switch allows the battery to send a powerful surge of electricity to the starter when the car is being started. Without this switch in good working order, you are dead in the water?or the parking lot. It also allows you to control many of the car's accessories when the car is parked while preventing accessories from running down the battery. Sometimes located on the dash or steering column, replacement can be easy with basic mechanical knowledge, hand tools and afternoon. Always reference your Camaro's service shop manual before tackling an electrical project like this. Nothing is worse then a dead car. HINT: For Automatic Transmission Cars, If the engine will not crank with the car in park, push down the brake pedal and try cranking the engine with the car in neutral. If it starts, your ignition switch is good and most likely your neutral safety switch is bad. This test is bypassing the park position in the switch and now is using the little used neutral circuit. If in neutral the engine starts the neutral safety switch is probably bad. We have the widest selection of neutral safety and back-up switches in the industry to get you back on the road.

PLEASE NOTE: Wiper switch MUST be grounded to dash for the wiper system to function properly. We often take our 1967-1968 Camaro wiper switch for granted. They do a wonderful job of keeping us safe during inclement weather. Before Mary Anderson's wonderful invention of the wiper system in 1903, the only way to drive during rain or snow was to literally open or prop the windshield and expose yourself and passengers to the harsh elements. We usually don't pay as much attention to the health of our F-Body Camaro wipers until they struggle or out right fail. Often, out right failure will be caused by faulty, worn or broken Camaro wiper switch. Usually replacement can be done with simple hand tools in an afternoon. Remember to always reference your 1967-1968 Camaro service shop manual before starting any electrical project.

Best Quality Reproduction Camaro Gas Cap Used On All 1967 Big Block Or 1968 SS & SS/RS Camaro Includes Retaining Cable, Swivel & Nut NOS GM Camaro gas caps are way too expensive and to top it off, they are full of pits and covered in die-cast flashing. This quality reproduction Camaro SS gas cap is perfect for your show car Camaro or a daily driver at a fraction of the cost! NOTE: In rare instances, the gas cap on a 1967-68 Camaro may sit clocked more toward the passenger's side giving the appearance the ?SS?, ?RS? or the standard cap is crooked. 99% of the time, this is a result of the gas filler neck being worn out (bent) and not a defective gas cap. Please check the cap stops on the inside of your fuel filler neck and adjust them with a pair of needle-nose pliers before calling Customer Service.

New stock reproduction dual exhaust system made for 1967 1968 Camaro Z28. May be used on other small block 67-68 Camaro as well. This complete system includes aluminized head pipes, over axle pipes, resonator eliminators pipes, cross-flow muffler, and tailpipes. Headpipes are 2-1/4 inch coming off the manifolds. Also include flanges to bolt up to stock exhaust manifolds. The tailpipes are oval and turn down at the end just like a stock exhaust and dump behind the axle. Original looking flat spots are also reproduced. This is the best system on the market!!! The aluminized coating on this exhaust maintains color and appearance even on daily drivers. This system is made to fit coupe and convertible. A tapered die is used so there are no stamping marks on the head pipes.

Practically An Instruction Manual On Installing Parts Detailed Drawings Highlight Step By Step Assembly Torque Specs For Fasteners Throughout Emblem Placement Measurements The Camaro assembly manuals are detailed reproductions of the books used on the Chevrolet assembly line. It is certainly one of the ?Big Three? most helpful manuals we've used on our own cars here (the other two being the Fisher Body Manual and the Chassis Service Manual). Multitudes of exploded view illustrations depict how the car was originally assembled. These manuals are highly recommended for doing any type of restoration work on your Camaro. The best investment you can make before starting any restoration. A must for your Camaro Library!

It is certainly one of the "Big Three" most helpful manuals we've used on our own cars here (the other two being the Factory Assembly Manual and the Fisher Body Manual). The Chevrolet Chassis Service manual covers "on vehicle" repairs on simpler repairs such as brakes, fuel system and suspension to more challenging repairs such as transmissions, engines and rear ends. Page one contains a quick index to get to the right chapter for the repair. Each chapter begins with a table of contents and a special tools section so you know what you are getting into before you begin. A must have in your Camaro Library!

Full Wiring Schematic Wire Sizes Fuse Placement and Values Air Conditioning & Power Window Diagrams Included This is another one of those must have books for your Camaro library. Wiring can be a really spooky thing to the beginning restorer. We have had many calls on the technical assistance lines where someone has turned their Camaro wiring into a pile of recyclable copper because they did not know exactly where a certain wire went. NOTE: 1968 Console Gauge schematics are NOT included in this manual. Those schematics are sold separately under part # GWM-79.

(xviii) Return Policy. Items must be returned in the original packaging within 30 days of invoice date for a refund of product cost to the original terms on the invoice. Items returned within 30 days not in the original packaging are subject to a 30% restocking fee. Items returned after 30 days not in a condition to be resold will be repaired and returned at the customer's expense. If the item is not repairable it will be returned to the customer at the customer's expense. Items returned after 30 days in the original packaging you will be issued a refund to the original terms on the invoice less a 30% restocking fee. Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. Exception returns may result in a merchandise credit. There are no returns on seatbelts. There are no returns on special order items. In the event the item is defective it will be replaced. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xix) Cancelled Orders. If a customer requests cancellation of an order after the order is in processing in our warehouse, or after the goods have actually been dispatched from the warehouse to the shipping department, www.camarodepot.ca reserves the right to charge a restocking fee of up to 30% of the value of the goods, deducted from the resultant refund or credit. (xxi) Pricing Policy: Due to the fluctuation in exchange rate on a daily basis, www.camarodepot.ca cannot provide a refund for

any decreases in pricing on our website. Pricing of all parts includes conversion into Canadian dollars based on the daily exchange rate. www.camarodepot.ca reserves the right to cancel any orders due to pricing errors on any products.

(xxii) Electrical Item Warranty: www.camarodepot.ca does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
