GASKETS AND SEALING SYSTEMS » T-Top Panel Seal

Replace your T-Top weatherstrip with OER® reproduction rubber. Installs exactly as original and will eliminate rattles and noise caused by an insufficient sealing. Will also keep rain and other weather related elements from seeping into the interior. This 8-piece weatherstrip and molding set contains RH and LH weatherstrip seals including plastic gutter strips necessary to repair both sides. Includes detailed installation instructions. Note: Early 1988 F-body models featured an interlocking slider bracket molded into the T-Top body side weatherstrip. This replacement weatherstrip does not include this feature, but all components will install and function correctly on early 1988 models. **Applications:**

- 1982-1992 Chevrolet Camaro
- 1982-1992 Pontiac Firebird

Quality Reproduction Ozone & UV Resistant 2nd Design Kit Includes Roofrails (With T-Top Body Weatherstrip) & Rain Flaps Kit Does LH And RH Sides 4 Piece Kit T-tops are great on sunny days! But, they can be a pain on rainy days. These seals match factory specifications and will easily replace your original weatherstrips. Being ozone and UV resistant, these seals are sure to protect your Camaro and fit better than the original GM part. You'll be much better off with these new weatherstrip seals. NOTE: 1982-85 have a 1st design t-top weatherstrip with round edges on the inner t-top sealing surface. 1986-92 use the 2nd design with the square edges. This 2nd design will work with all 1982-1992 Camaros.

GM used two different mounting bolt patterns on the strut mount retainers for the 1982-1992 F-Body Camaro and Firebird. 1982-1986 cars have one type, 1987-1992 cars have another type. All replacement strut mounts are machined to the 1987-1992 style mounting pattern. If you will be installing replacement strut mounts on a 1982-1986 car, you will need to get these 1987-1992 style retainers. Our strut mount retainers are CNC laser cut from 3/16" steel and have new (longer than stock) mounting bolts, flat washers and stainless steel nuts.

Restoration Correct Spring Steel Retains Window Crank Handles & Standard Inner Door Handles Replacement For Part#: 702255 The window cranks on your 1967-1992 Camaro are used to enable movement of your windows, but what would you do if your cranks did not work? Your Camaro also requires a crank handle retaining clip, which is used to retain window crank handles and standard inner door handles. Whether this breaks or gets misaligned, it will keep your Camaro's window cranks from working properly. Made with spring steel, these retaining clips are sure to keep your window crank handles secure and in working condition for your Camaro.

Reproduction Of Original Holds Shoulder Belt Retainer To The Upper Portion Of The Bucket Seat Commonly Overlooked Or Lost During Replacement of Seat Upholstery Fits Driver's Side (LH) While the shoulder belt retainer is important in retaining your seat belt in a locked position, the shoulder belt guide escutcheon is necessary in keeping the retainer in place in your 1974-1992 Camaro. The guide escutcheon holds your Camaro's shoulder belt retainer to the upper portion of your bucket seat, and without it, the retainer could not be held up, and your shoulder would fall. This is a commonly overlooked or lost item during seat upholstery replacement, but is important for function and for the look of your Camaro's interior.

CLUTCH » *Clutch Boots & Seals*

The bellhousing to clutch fork rubber boot seals out water and dust by sealing around the clutch fork and the rectangular fork hole in the Camaro clutch bellhousing. Every time you push the clutch pedal in your manual transmission Camaro, the clutch fork boot gets a work out and will eventually tear. NOTE: Camaros with hydraulic throw out bearings may use this boot for the hydraulic lines to pass through as some measure of protection. However, the clutch fork boot will not provide an air tight seal.

Best Quality Reproduction Camaro Fender Emblem Modeled After 68-69 Camaro Officially Licensed GM Restoration Part Bright Chrome Over Die-Cast Correct Spacing & Size C Is The Correct Height Unlike Other Reproductions Good looking emblems can really make a new paint job on your 1968 or 1969 Camaro shine! The original GM Camaro script fender emblem has become rough around the edges from years of casting and the C has become a smudged blob. Matching the original, this die cast emblem has a beautiful chrome finish, adding to the overall shine of your F-Body. This emblem fits all 1968 and 1969 Standard Camaros, Super Sport (SS) & Z28.

Quality Reproduction Of Original Official GM Restoration Part Injection-Molded Plastic Upper-Left Grille Assembly Fits Z28 Models Only For Right Counterpart See P/N 702247 When it comes to your 1982, 1983, or 1984 Camaro, the grille assemblies are a major focal point. These integral parts afford your classic the sleek design and pizzazz common of the 80's. Your Camaro's grilles unlock a unique style, setting the standard and flair for the rest of the car to follow. As most car enthusiasts know, automobile grilles are prone to damage. Due to their prominent location, the upper grilles are vulnerable to an array of elements. Little stones and grains of sand can effectively sand blast the front of your Camaro away. Maybe it is an accident or a new desired look, the fact is that it is not uncommon to either replace or upgrade the front grille sections. Achieve a premium look and peak performance; invest in a new set of upper grille assemblies for your 1982, 1983, and 1984 Camaro.

Replacement Bolt Correct Style Bolt Except For Head Marking Secures Hold-Down Clamp Battery hold-down clamps are a must for restoration on your 1967-1981 Camaro. This Camaro battery clamp holds your battery in place safely and securely to avoid a dangerous condition or costly damage to your F-Body Camaro's battery. Unfortunately, over time this clamp can become loose, due to broken or missing bolts. While very small, this bolt serves a large purpose, which is keeping your Camaro's battery secure and in working condition.

Premium Quality Power Window Switch Reproduction Of Original Fits 1984-1989 Camaros Center Console Window Switch Fits Right Or Left Side Your 1984, 1985, 1986, 1987, 1988, or 1989 Chevrolet Camaro was meant to keep you comfortable while driving in nice weather. Easy-to-open windows make this happen. Power window switches route power directly to the respective door window motors and allows the motors physically raise and lower. This Camaro switch consists of the operating buttons or toggles, circuit board inside the unit, and contact points for your wiring. When you move the button or toggle, an electrical connection is made by touching contact points together and power is routed accordingly. This is one of the highest failure items on any vehicle. If your Camaro's power window switch starts to smoke, button develops excessive play or button breaks off of the switch completely, you will need to replace the F-Body power window switch. Although extremely rare for a fuse to blow or the problem to be faulty wiring or motor, you should still check these items before replacing the Camaro power window switch. steppedbezel? and button. Completely assembled with correct black spring steel mounting clips installed, installation is sure to be easy. Nothing beats cruising in your 1984, 1985, 1986, 1987, 1988, or 1989 Camaro with your arm resting over the open window.

(xviii) Return Policy. Items must be returned in the original packaging within 30 days of invoice date for a refund of product cost to the original terms on the invoice. Items returned within 30 days not in the original packaging are subject to a 30% restocking fee. Items returned after 30 days not in a condition to be resold will be repaired and returned at the customer's expense. If the item is not repairable it will be returned to the customer at the customer's expense. Items returned after 30 days in the original packaging you will be issued a refund to the original terms on the invoice less a 30% restocking fee. Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. Exception returns may result in a merchandise credit. There are no returns on seatbelts. There are no returns on special order items. In the event the item is defective it will be replaced. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xix) Cancelled Orders. If a customer requests cancellation of an order after the order is in processing in our warehouse, or after the goods have actually been dispatched from the warehouse to the shipping department, www.camarodepot.ca reserves the right to charge a restocking fee of up to 30% of the value of the goods, deducted from the resultant refund or credit. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xx) Verify Members' Address: www.camarodepot.ca reserves the right to contact a Member via email to verify the accuracy of account information (including the Member's correct name and address) that is needed to provide the Member with the information he or she requested from www.camarodepot.ca.

(xxi) Pricing Policy: Due to the fluctuation in exchange rate on a daily basis, www.camarodepot.ca cannot provide a refund for

any decreases in pricing on our website. Pricing of all parts includes conversion into Canadian dollars based on the daily exchange rate. www.camarodepot.ca reserves the right to cancel any orders due to pricing errors on any products.

(xxii) Electrical Item Warranty: www.camarodepot.ca does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
